Suncorp Stadium provides Brisbane and south-east Queensland with a 52,500 plus seat capacity, state-of-the art, world-class stadium able to accommodate a range of uses. The redevelopment also included 25 food and beverage outlets, 34 bar outlets, 4 members' bars, 13 bay bus station, 1.7 kilometres of upgraded pedestrian walkways, and 280 metres of elevated walkways.

As part of the Stadium redevelopment, two large tanks with a combined capacity of 250,000 litres were installed. Rainwater is collected from the Stadium roof is used to irrigate the playing field. This in turn eases pressure on demand from the city's water supply. A good four minute shower will capture enough water to fill both tanks and provide enough supply to irrigate the field for between two and three weeks.
